Unleashing Crypto's Hidden Potential!"

REDIANT MINING

WORLD'S LEADING CRYPTOCURRENCY CLOUD MINING SERVICE PROVIDER

INTRODUCTION

REDIANT MINING

Welcome to Rediant Mining ,Introducing a new technology of making money. It is UK based program start in company 2016, which is latest, fully automated and highly secure with latest technology.

Rediant Mining is a mission where you can complete all your dreams by joining this mission. This is a platform where you can fulfill all your needs. All success-ful people men and women are big dreamers.

They imagine what their future could be, ideal in every respect, and then they work every day toward their Distant vision, that goal or purpose In network marketing, the whole point is not to sell a product but to build a network, an army of people who are all representing that same product or ser-
vice to share with others.

REDIANT MINING

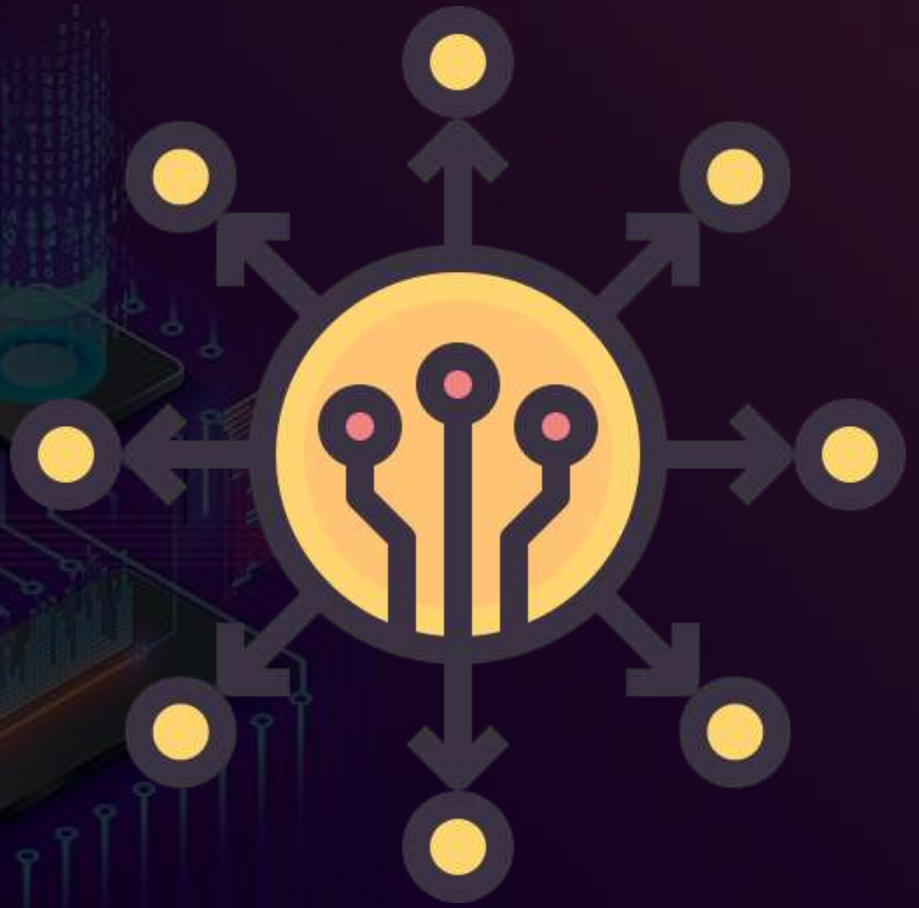
WHAT IS CRYPTOCURRENCY

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets

WHAT IS DECENTRALIZATION

REDIANT MINING

What is decentralization? What are its benefits and advantages? Decentralized marketing is created on an automated contract that guarantees you maximum security and stability. A smart contract is an algorithm with automatic execution. It exists inside the Smart Chain block chain, which is one of the top crypto currencies. Smart contracts, like crypto currencies themselves, are decentralized. They work strictly according to a certain program, and once they are launched, it is impossible to change their mode of operation. The code that determines the logic of a smart contract is written in a block chain, and all calculations are performed by millions of computers around the world. This ensures that a smart contract cannot be hacked or stopped.



BLOCKCHAIN TECHNOLOGY

REDIANT MINING

Blockchain technology is a structure that stores transactional records, also known as the block, of the public in several databases, known as the "chain," in a network connected through peer-to peer nodes. Typically, this storage is referred to as a „digital ledger.“ Every transaction in this ledger is authorized by the digital signature of the owner, which authenticates the transaction and safeguards it from tampering. Hence, the information the digital ledger contains is highly secure..

REDIANT MINING

WHAT IS CRYPTO CURRENCY MINING?

Mining is the process that Bitcoin and several other cryptocurrencies use to generate new coins and verify new transactions. It involves vast, decentralized networks of computers around the world that verify and secure blockchains – the virtual ledgers that document cryptocurrency transactions. In return for contributing their processing power, computers on the network are rewarded with new coins. It's a virtuous circle: the miners maintain and secure the blockchain, the blockchain awards the coins, the coins provide an incentive for the miners to maintain the blockchain.

TYPES OF CRYPTO CURRENCIES

COINS

A coin is a digital currency similar to physical currency

Coins can operate on their own blockchain with their own protocol

Coins can be used as a source of payments

i.e. Bitcoin and Ethereum

TOKENS

A token is a digital asset issued on a particular project

Tokens don't necessarily operate on their own blockchain

Tokens can be used for payments and signing digital agreements

i.e. Utility and DAO Tokens

WHAT IS REDIANT CLOUD MINING?

Cloud mining entails mining for cryptocurrencies through the rental or purchase of mining equipment from a third-party cloud provider, who is responsible for equipment maintenance. Popular cloud mining methods consist of hosted mining and rented hash power.

BENEFITS OF JOINING
REDIANT MINING

- Best platform for cryptocurrency mining.
- Can mine cryptocurrency without any hardware setup and maintenance.
- Get 150% to 200% assured mining agreement.
- Rediant mining referral program is the world's highest paying referral.
- Here you can make a team and earn up to 500 $ every day on single Server.
- Rediant mining servers to support Bitcoin mining by June 2028.
- Rediant mining is decentralized mining & referral program.
